

INCREASE CLEANING PERFORMANCE, SAFETY AND SUSTAINABILITY

The TVL 850/250T, equipped with five NX1K lithium phosphate batteries, delivers extended cleaning performance with enhanced safety and sustainability. Easily adjustable scrubbing widths from 26"–34" allow you to adjust for tight narrow areas and wide open spaces with one machine. Unique spring loaded gull wing design allows the brush deck to close when it contacts an obstruction (door frame, column, etc.) so as to not damage the machine nor the obstruction.
