

WHY NACECARE?

We're not just selling machines—we're leading a movement in small space innovation. At NaceCare, every vacuum, scrubber, and extractor is purpose-built to be nimble, powerful, and efficient where it matters most: in real-world, high-demand environments.

- Industry-Leading Filtration & Low Noise
- Compact, Durable Designs
- Energy-Smart Performance
- Award-Winning Micro Solutions
- Interchangeable Battery Technology for Non-Stop Productivity

When space is tight, performance matters more. That's why professionals across North America trust NaceCare Solutions to deliver clean that works.

INDUSTRIES WE SERVE

We serve diverse markets with solutions tailored to each environment—adapting our equipment, technology, and support to meet the unique demands of every space and customer.

WHY NACECARE? PRODUCT LINE EDITION

SOFT FLOOR CARE

For carpets, upholstery, and everywhere first impressions count. Clean soft surfaces not only look better, they last longer, reduce allergens, improve air quality, and protect your facility's reputation.

- Uprights, canisters, backpacks, and extractors for every need.
- HEPA filtration for healthier indoor environments.
- Lightweight, whisper-quiet models for discreet cleaning.
- Deep-cleaning power for high-traffic areas.

HARD FLOOR CARE

From restrooms to retail, we make tough jobs easier. Our floor care line delivers consistent results—tight corners to wide open spaces. With advanced batteries and a scrubber for every space, you get cleaner floors, faster dry times, and better efficiency.

- Micro scrubbers, walk-behinds, and spotters for tight spaces.
- Mid-size and large scrubbers for expansive areas.
- Ergonomic, cordless designs for all-day comfort.
- Low-moisture systems for quicker turnaround and safer floors.
- Powered by NX300 and NX1K lithium phosphate batteries—fast-charging, long-lasting, and built to perform.

CYLINDRICAL FLOOR CARE

Brush up on better cleaning. Cylindrical machines tackle textured floors with ease—lifting debris, scrubbing efficiently, and cutting labor by eliminating pre-sweeping. They deliver a deeper clean where disk scrubbers can't.

- Dual cylindrical brushes dig deep into grooves and uneven surfaces.
- Sweeps and scrubs in one pass—no separate steps required.
- Exceptional edge and line cleaning for tile, grout, non-slip, and safety flooring.
- Compact, maneuverable units for tight spaces and larger options for corridors and public areas.

INDUSTRIAL LINE

When downtime is costly, your equipment should work as hard as your team. Our industrial line cleans large areas fast—boosting productivity, reducing disruption, and tackling everything from concrete dust to oil spills.

- High-capacity wet/dry vacuums to handle spills, dust, and debris in demanding environments.
- Large walk-behind and ride-on scrubbers for warehouses, distribution centers, and manufacturing plants.
- Rugged, impact-resistant construction built to withstand harsh conditions and heavy use.
- Powerful suction and scrubbing systems designed for speed, efficiency, and long run times.

NX300 BATTERY PLATFORM

Maximize uptime, cut the cord, and keep cleaning without compromise. Our award-winning NX300 lithium-ion battery technology delivers the runtime, durability, and flexibility you need to stay productive all day.

- Fast charging: 80% in just 1 hour
- 2,500-charge lifespan backed by a 4-year warranty
- One battery powers 10+ different machines
- Quick change capability for continuous cleaning without downtime
